

BE A FOSTER SAVE A LIFE

The SPCA Cincinnati's Foster Care Program provides temporary housing and care for dogs, cats, puppies, and kittens who aren't quite ready for adoption. By taking in one animal, you create space for the shelter to help save the life of another animal. We need loving homes like yours to continue helping these animals who need a little extra time and love.

Foster Care FAQs

What kind of animals need foster care?

- Puppies and kittens under two months old
- Mothers with nursing litters
- Dogs and cats with medical conditions or injuries
- Special needs fosters

Can I become a foster caretaker if I have pets of my own?

Yes, we welcome pet owners as foster caretakers. Please keep in mind that there is always a health risk when exposing your pets to other animals, no matter the setting. However, the risk is minimal if your pets are vaccinated and in good health.

How long do animals need to stay in foster care?

The typical foster stay is two weeks to two months, depending on the needs of the individual animal(s) in your care. The timeframe of each foster situation will be discussed with you ahead of time.

What expenses are involved with foster care?

The SPCA Cincinnati strives to provide most, if not all, supplies needed while an animal is in your care. All medical care such as vaccinations, medication, and spay/neuter surgery will be conducted at the shelter.
